Dear Parents/ Carers

In Term One, your child was working hard to learn all the single sounds of the Jolly Phonics program. Jolly Phonics is a fun, multisensory way to learn different letter sounds.

The students enjoy stories and songs about each sound and corresponding letter or letter combination. They also learn an action for each sound taught. They reinforce the sound and correct letter formation in their Jolly Phonics booklet which is attached as well as engaging in other activities based around the sounds taught so far.

There are 42 Jolly Phonics sounds to be taught this year. In Term 2, we will begin to learn the two letter combinations that are used to make other sounds.

In the Jolly Phonics packs that are sent home is a sheet that shows and describes the actions of the sounds that have been taught in class. The strip of words are the ones which follow the correct sound pattern so your child could make these words by blending their sound cards together.

Thank you for your support at home to reinforce these sounds and actions. It is an important reading and writing skill to be able to hear and record sounds.
